

PICK & PACK ROBOT PackBot™

Pick & Pack

PackBot is a robotic automation solution designed to pick items randomly presented on a conveyor and pack them into a stack or container with high accuracy and consistency using advanced vision technology.

Flexible Design

PackBot capability can be provided over a wide range of payload and reach requirements; including both six axis and delta style robots.

Integrating the Best Technology

Chicago Electric is a leading Yaskawa/Motoman Solution Provider; a Rockwell/Allen-Bradley Recognized System Integrator; and a Cognex Partner System Integrator.
